

INNOVATIVE SOLUTIONS FOR YOUR BUSINESS

ABOUT US

NASA Engineering and Trading Service Co., Ltd was established by Mr. Nguyen Phuoc Quy Han, who has been working passionately in the pass 25 years and built up his dream to create a company that provide all solutions and guarantee success by taking full responsibility for the overall project.

NASA is a member of Dong Thap Business and Start-up Group, gathering the top expert companies in order to optimizes technologies, bringing the best option up to the highest market standards. With our knowl- edge and experiences, we show you how we select and take care of each component to develop your unique business plant from the very first to final step.

NASA is ready to meet all the most stringent requirements from customers in the field of refrigeration systems, freezing equipment, processing equipment, cold storage and solar power system for seafood processing factories, agricultural products, logistics cold storage...

REFRIGERATION SYSTEM

Industrial Refrigeration applications are of the utmost importance, for providing direct cooling. The increased reliance of industry on refrigeration calls for more and more unique, individualized systems which perform to strict specifications to meet the needs of the given.

NASA, an exceptional contractor of Industrial Refrigeration systems, can guide you through the process from conception to completion. We can design a system that will meet the needs for performance, energy efficiency, and is environmentally friendly regardless of the industry or process in question.

We are your reliable technology partner
We create solutions according to your needs and guarantee success by taking full responsibility for your overall project.

COMPRESSOR

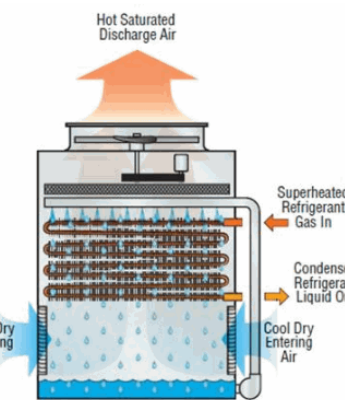

Compressors used in industrial refrigeration applications, they perform the same primary function, to increase the pressure of the refrigerant. NASA can guide you through the decision-making process and help to ensure that you look at all the factors which may dictate one type of compressor over the other.

EVAPORATOR

The type of evaporator will depend on your application, what is it that you intend to cool, and how do you want to cool it? In applications where the decision may not be as straight forward, get in touch with NASA for the details regarding the use of each type of evaporator.

CONDENSER

The hot, gaseous refrigerant leaving the compressor enters the coil, known as the condenser, commonly located outdoors. There are evaporative condensers and air or water-cooled condensers, though specific applications or locations may find that one is a better choice operationally than the others. NASA can provide you with the information necessary to determine which type of condenser is best suited for your project and location.

Although the refrigeration cycle works in basically the same manner regardless of the technologies and types of components selected, it is crucial to choose the correct components for a given application. We are built to support you to find the right one.

FREEZING EQUIPMENT

Are you looking for the quickest freezing and the freshest wares? Whether it's full freezing lines, or individual IQF, Glazing Machine, Re-freezer Air Blast Freezer, or Contact Freezer, NASA products offer you quick and cost-effective freezing, maximum hygiene, and intuitive operation.

NASA combines the finest European technologies with an unequalled drive to excel into custom-built freezing solutions. We are proud of ourselves to offer clients freezing equipment with the highest quality and hygienic standards, and meticulous care for details. While our products are relatively easy to clean and use, NASA professional technicians will help your staffs to maximize the value of products in terms of sanitation and operation. This helps you strive for the highest levels of hygiene and efficiency.

Automatic IQF processing line for frozen seafood

For full freezing lines perfectly attuned to each other, we offer a new industry standard. From input conveyors through freezing IQFs to outfeeds, NASA products make sure you work at the highest levels of hygiene and efficiency. Increase your overall output with a NASA processing line.

IQF STEEL BELT

Quickly freeze your fish fillets, squid, clams, or other seafood products without a conveyor footprint, and sell the most visually appealing product. Rely on our IQF Steel Belt for better hygiene and overall performance. Are you looking for reliable and durable freezing equipment that does not leave a print, helps you increase hygiene standards, and reduce overall costs? NASA IQF Steel Belt is your best choice.

IQF MESH BELT

NASA IQF Mesh Belt freezer is ideal for handling both individual and multi-packed products such as shrimp, clams, fruits, or vegetables, whether they are vacuum-sealed, in cardboard boxes, or polystyrene trays. Our IQF Mesh Belt offers frozen product at minimum energy consumption rates. It is available in both Cleatrac® and Eyelink belt options depending on your application or preference.

GLAZING MACHINE

NASA's dipping and spraying glazers carefully add a smooth layer of chilled water to your products. Our Automatic Control Panel lets you control your glazing rates meticulously. To harden your glazing layer and secure the exact required core temperature of your frozen seafood products before storage, NASA's re-freezers are an essential addition to your line.

CONTACT FREEZER

Are you looking for the highest hygiene standard and quickest freezing times in contact plate freezing? NASA's Contact Freezer ensures rapid freezing from top and bottom, by evenly pressing your individual food units between two aluminium contact plates, quickly and evenly reducing temperatures throughout the product.

AIR BLAST FREEZER

Our Air Blast Freezer supremely insulated air blast cabinets are constructed with stainless steel plates, insulated with excellent PU foam. This ensures durable and airtight freezing chambers, and eliminating thermal loss.

CHILLER AND COOLING SYSTEM

With a focus on efficiency and precision, our solutions ensure optimal temperature control, preserving the quality and freshness of dairy or beverage products throughout production. Leveraging cutting-edge technology, NASA provides systems that meet stringent hygiene standards, reduce energy consumption, and enhance overall operational efficiency. From initial consultation to installation and maintenance, our expertise ensures seamless integration of cooling systems that cater to the specific needs of milk, beverage processing, enabling consistent, high-quality output for our clients.

PROCESSING EQUIPMENT

Quality and technology are among our top priorities. We continually seek innovative technologies that not only optimize production capacity and conserve labor and energy but also enhance product quality and deliver greater value to our customers.

ELECTRIC STUNNER

The humane way to stun. Our electric stunning system is the most humane way to sedate all types of aquatic species. Scientifically verified and in compliance with European and Norwegian standards, the Electric Stunner renders fish unconscious safely and in a stress-free manner.

INPUT PRODUCT

- Input conveyor
- Scale
- Electric stunner

PROCESSING

- Bleeding & Submerging
- Filleting & Trimming
- Skinning & Tumbling

FREEZING PROCESS

- IQF
- Glazing Machine
- Re-freezer

PACKING

STORAGE

COLD DRUM SKINNING MACHINE

The skinning machine works on the principle that the skin surface freezes on a cold drum. It is designed to improve skinning results with no reduction in speed, and is able to skin fillets and portions without any loss of yield. No strain is put on either the skin or the flesh, resulting in a great quality fillet. With the capacity from 180 to 300 pieces per minute, the machine can save up to 30% of fish trimming work.

PROCESSING MACHINES

Processing equipment forms the backbone of any food processing plant. To fulfill the demands of turnkey projects, we deliver custom-designed solutions tailored to the unique requirements of seafood, food, and agricultural processing facilities. Our equipment is engineered to align with the desired capacity and advanced technologies specified by the investors, ensuring optimal performance and efficiency.

(*) The processing depend on output product requirements. Different equipment may be requested to suitable with the process.

COLD STORAGE

Cold storage is one of the most important parts of the frozen food supply chain, linking the manufacturing process with transportation to the retailer.

A good cold storage technologies and techniques aimed at improving efficiencies have proliferated, cold storage warehouses have become more complex to design.

NASA will bring you to the best experiences.

Sandwich panel is light weight, fireproof, insulating, soundproof, easy to be joined together without external adhesive, the size can be custom-made as requested by investors. The products are most diverse in the market with all types: EPS, PU, PIR, rockwool – will perfectly replace conventional wall building materials in the field of construction, namely cover walls, external walls, closures for factories, warehouses, clean rooms or cold storages.

- Lớp sơn phủ Polyester cao cấp
Premium polyester finish coat
- Lớp xử lý bề mặt và lớp sơn lót
Pre-treatment & Primer coating
- Thép mạ công nghệ ActivateTM
Alloy coated steel with Activate technology
- Lớp xử lý bề mặt và lớp sơn lót
Pre-treatment & Primer coating
- Lớp sơn mặt sau Stick Foam
tạo bám dính tối ưu
Stick Foam backer coat for optimal layer adhesion
- Lớp cách nhiệt
Insulation Foam

COLOUR CHART

THE BREAKTHROUGH TECHNOLOGY FOR WITHSTANDING SEVERE ENVIRONMENTS

Insulation Panel is a premium sandwich panel, made of new generation building materials with two faces of super durable 4-layer coated steel of Bluescope Company (Australia) and PIR core (Polyisocyanurate) on modern European technology continuous production line.

Sandwich panel have stable quality, is trusted by hundreds of contractors, used for thousands of projects nationwide

The most diverse range of products in the market with all types: Panel EPS, Panel PU, Panel PIR, Panel rockwool

The leading production line of Europe, largest & fastest production capacity of sandwich panel

SOLAR ENERGY SYSTEM

Solar energy is the cleanest and most abundant renewable energy source available. On a much larger scale, solar collectors can generate power for thousands of people at once. Solar-thermal power plants use a variety of techniques to produce power using the sun. The sun’s energy is used to boil water which, in turn, operates a steam turbine to generate in a similar fashion to that of coal or nuclear power plants.

Modern factories and warehouses are often thousands of square kilometres, with high energy usage. Over the past few years, more and more businesses have seen the potential to harness free renewable energy simply by adding solar panels to their roofs. Energy bills are typically responsible for around 15% of operating costs in a warehouse facility, due to temperature control systems and lighting. By adding solar panels, which generate their own free electricity, these energy bills can be substantially reduced.

If you're looking to install solar on your business, NASA has a variety of resources to guide you through the process. Browse our customer portal to learn more about your options, what to look for in an offer, questions to ask a solar company, your rights as a consumer, and more.

TYPICAL PROJECTS

HAPPYFOOD VIET NAM CO.,LTD
Completion time: 2024
Location: Dong Thap

TNG FOOD CO., LTD
Completion time: 2023
Location: Dong Thap

HUNG HAU AGRICUTURAL CORP
Completion time: 2019
Location: Dong Thap

QUE KY FOODS CORPORATION
Completion time: 2021
Location: An Giang

THONG THUAN MILK JSC
Completion time: 2024
Location: Binh Thuan

DH LOGISTIC - DAIWAHOUSE VN (MEITO)
Completion time: 2022
Location: Long An

LOC KIM CHI SEAFOOD
Completion time: 2021
Location: Vinh Long

GLOBAL EARTH ARGO AND AQUA
Completion time: 2021
Location: Myanmar

NHA TRANG SEAFOOD (NTFS FACTORY)
Completion time: 2020-2022
Location: Can Tho

DH LOGISTIC - DAIWAHOUSE VN (NEW LAND)
Completion time: 2022
Location: Long An

VINH HOAN CORPORATION
Completion time: 2014-2015-2018-2020-2021
Location: Dong Thap

HUNG CA FACTORIES
Completion time: 2004-2015-2016-2021-2022
Location: Dong Thap

VINA PRIDE SEAFOODS – PHASE 2
Completion time: 2022
Location: Long An

THONG THUAN TRA VINH SEAFOOD
Completion time: 2021
Location: Tra Vinh

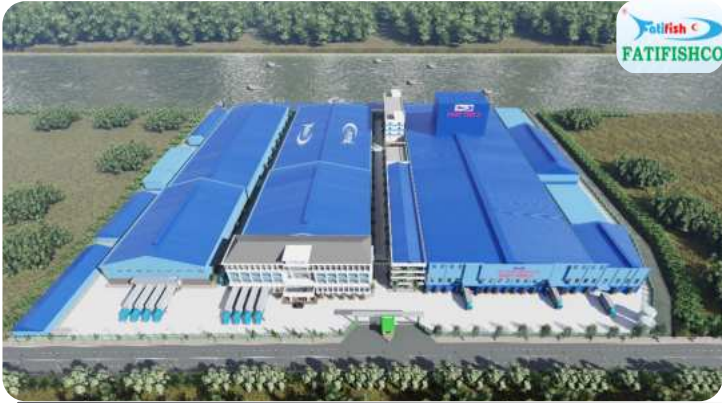

VANY CORPORATION
Completion time: 2018
Location: Dong Thap

HANAFISH CO., LTD
Completion time: 2021
Location: Dong Thap

TYPICAL PROJECTS

FATIFISHCO
Completion time: 2010
Location: Dong Thap

TRUONG GIANG FISHER HOLDING CORP - FACTORY 2
Completion time: 2019
Location: Dong Thap

ANMYFISHCO
Completion time: 2009
Location: An Giang

INTERFISH FACTORY
Completion time: 2019
Location: Dong Thap
